(By the list)**

Special economic zones (- further SEZ) play an important role in attracting investment into the country's economy by diversifying it and transitioning to an innovative economic growth. SEZ has proven to be one of the effective instruments of attracting investment worldwide.

There are 10 special economic zones with different sectorial focus in Kazakhstan. The zones have already become the center of attraction for a number of international and Kazakh companies from different fields. Oil and gas, machine-building, chemical, textile, metallurgy clusters are successfully operating on the basis of traditionally strong industrial infrastructure of the regions. The major producers operate within the SEZ getting the most of the unique integrative opportunities: central and regional support, special taxation conditions, ready-to-use infrastructure.

In order to present the investment potential of the Republic of Kazakhstan, in particular the opportunities of special economic zones, Kazakh Invest plans to hold a **road-show on October 6, 2017** in the city of Aktau, Mangystau region. The participants of the event are managing companies of SEZ RK, residents of SEZ, potential foreign investors and authorized state bodies. We invite you to participate in this event, where you will have an opportunity to familiarize yourself with the special conditions of SEZ residents, get acquainted with successful realized projects, and establish business contacts.
